

## General conditions

Changeable weather in Veneto during the whole period of this forecast. Chance of short, local precipitations especially in the afternoon and evening.

### Afternoon/Evening of Saturday 30

Clear-ups alternating with at times heavy cloudiness with scattered showers and light rain showers, occasionally thunderstorms. The mostly short precipitations will affect more frequently the mountains and foothills. On the plain light to moderate easterly wind and seasonable, slightly higher temperatures than on the previous day.

### Sunday 1

**Sky conditions:** In the morning wide sunny spells and chance of low layer clouds, more likely in the mountains, lifting later on. During the warmest hours of the day irregular cloudiness mostly due to cumuli which will be more likely and widespread near the mountains. From the evening on easing cloudiness.

**Precipitations:** Until mid-morning, on the plain low chance (0-20%) and in the mountains medium-low chance (20-40%) of some rain drops. Later on increasing chance of precipitations: in the south-eastern part of the plain medium-low chance (20-40%) and in the mountains and foothills medium chance (40-60%) of showers and occasional thundershowers. Again decreasing chance from the evening on.

**Temperatures:** Steady or slightly falling low temperatures, especially in the valleys. On the plain nearly steady and in the mountains rising high temperatures.

**Winds in the mountain:** Mostly light, shifting.

**Winds in the plane:** Light, shifting; breezes along the coast.

**Sea conditions:** Calm.

### Monday 2

**Sky conditions:** At first clear or scattered sky, except for some low clouds in the early morning, easing later on. Then scattered to partially cloudy sky due to some cumuli and high, southerly clouds approaching, especially in the evening.

**Precipitations:** Chance of single showers or light showers in the mountains and foothills during the warmest hours of the day; elsewhere only occasional precipitations or none at all.

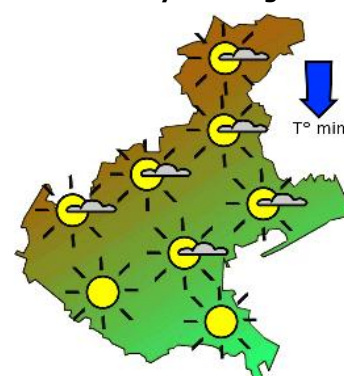

**Temperatures:** Mostly nearly steady temperatures, locally slightly rising in the mountains.

**Winds:**

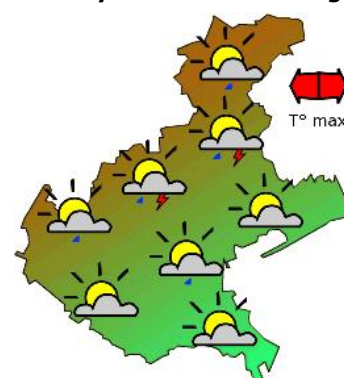

### Tuesday 3

Mostly cloudy due to medium-high cloudiness and some cumuli. Chance of local light precipitations. Rising low temperatures and falling high temperatures.
